VMWARE AND HYPER V

Assignment 1

:Hypervisor Installation As part of this assignment, you need to complete below tasks: 1. Install VMware ESXi on test hardware

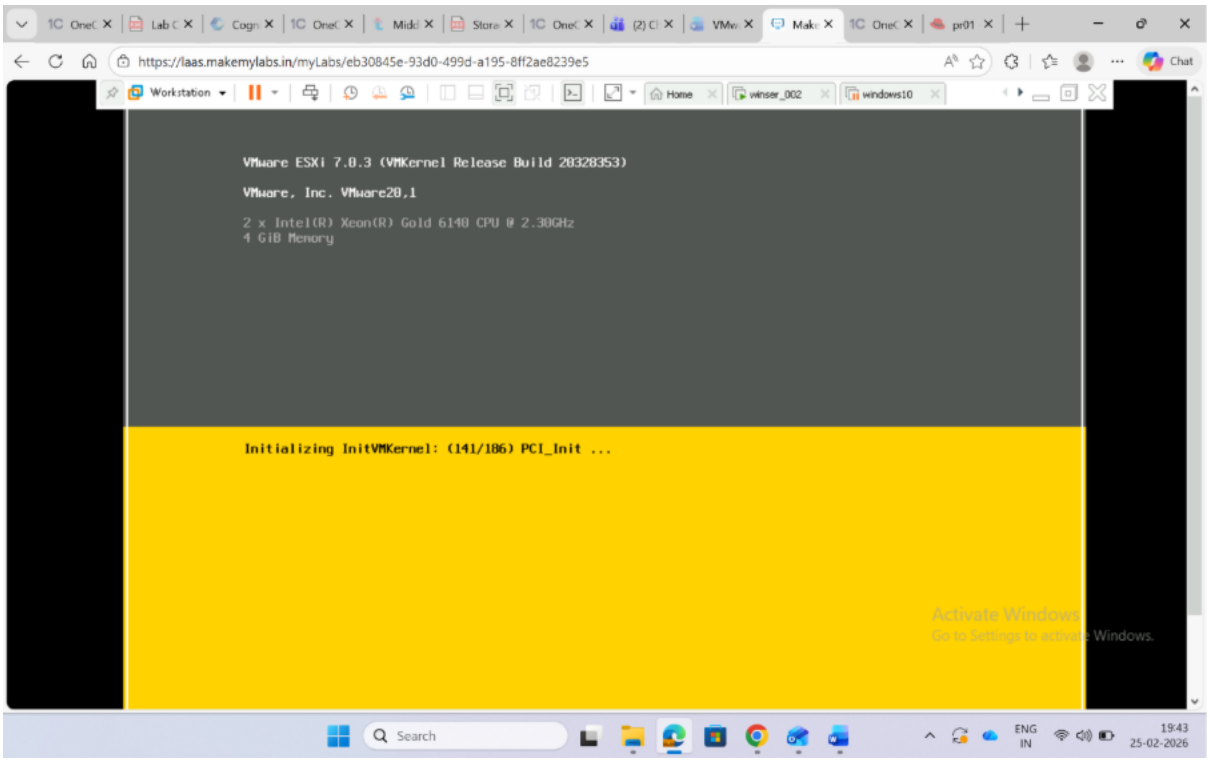

2. Configure initial network settings

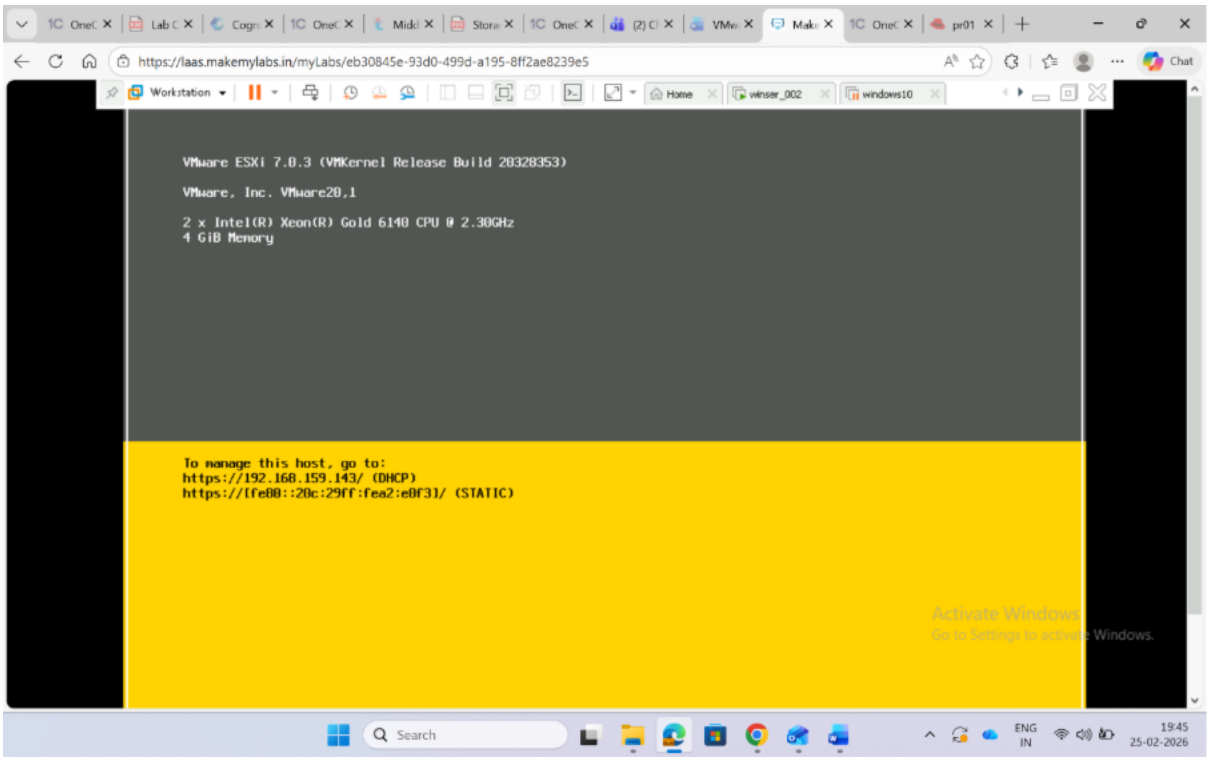

3. Set up remote management

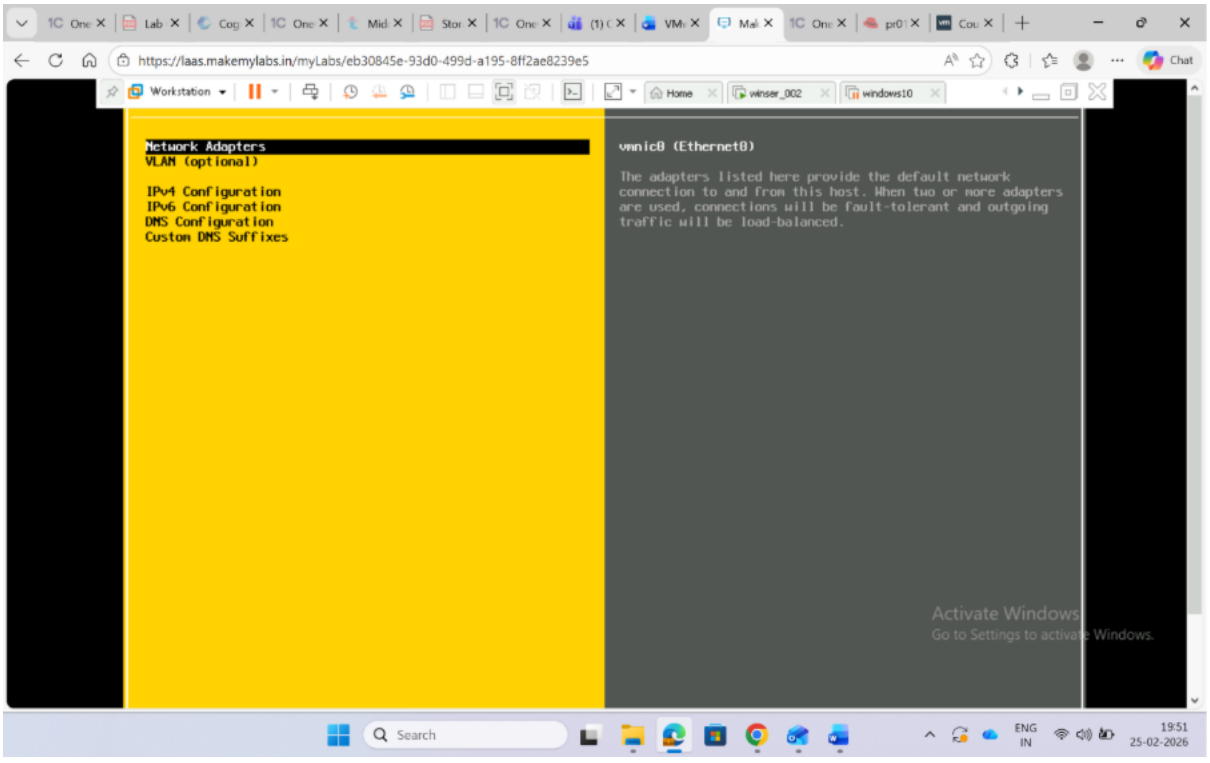

4. Create user accounts

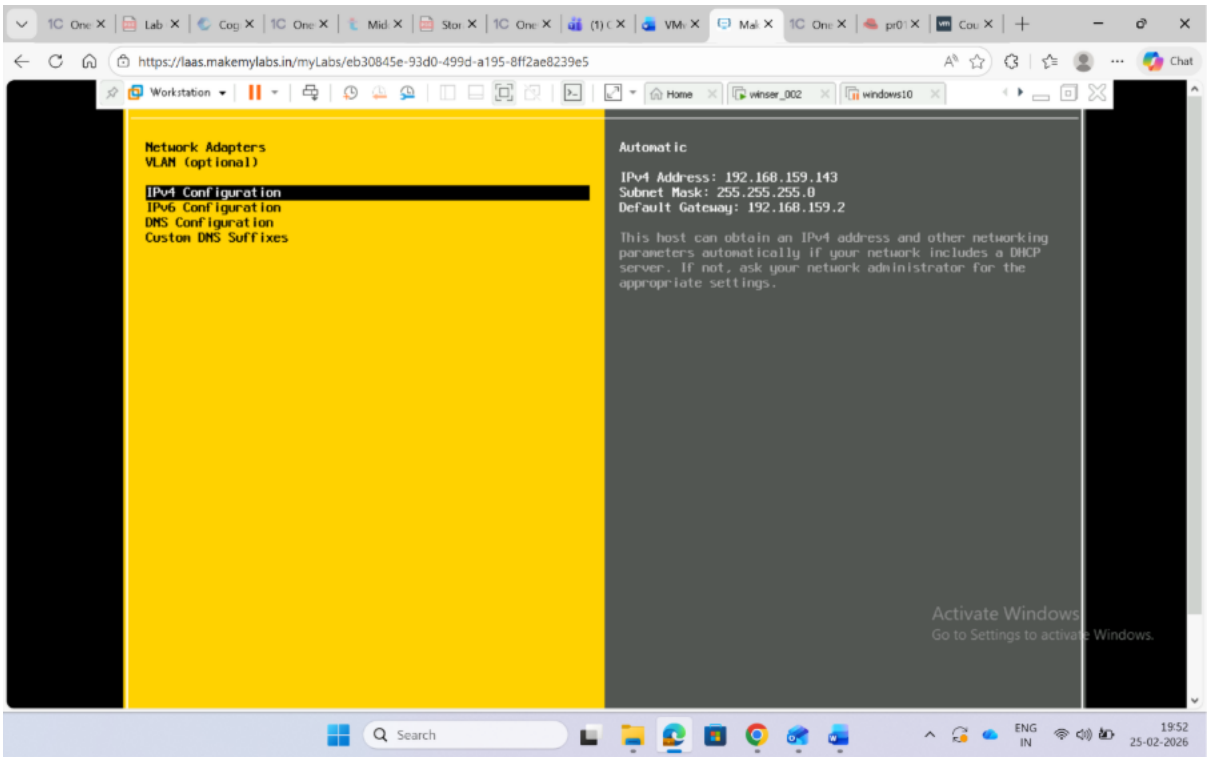

5. Configure storage repositories

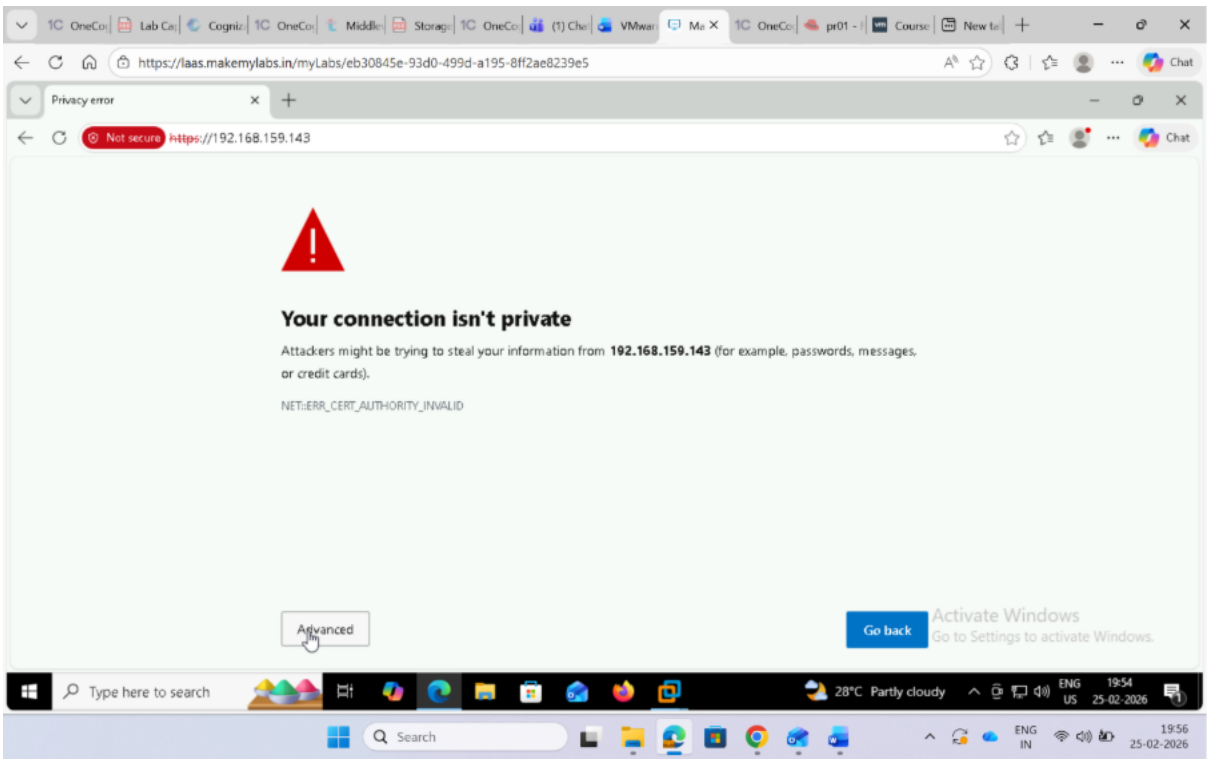

6. Practice remote VM management

6. Practice remote VM management:

Click on console:

Assignment 2:

Advanced VM Management As part of this assignment, you need to complete below tasks:

1. Create template VMs

2. Implement automated deployment

3. Configure VM startup/shutdown sequences

4. Practice VM migration techniques

5. Set up VM backup strategies

6. Experiment with different storage types

VMware & Hyper-V Assignment - 02

Advanced VM Management:

1. Create template VMs

2. Implement automated deployment:

3. Configure VM startup/shutdown sequences

4. Practice VM migration techniques:

Migrate it back tpo its original place:

5. Set up VM backup strategies:

Delete snanpshot to avoid datastore space usage:

6. Experiment with different storage types
